

- The 4-day conference will cover all aspects of micrometeoroid and orbital debris research, mission support, and other activities
 - Measurements: radar, optical, in-situ, laboratory, etc.
 - Modeling: engineering, long-term environment, reentry, etc.
 - Hypervelocity impacts/protection: impact testing, hydrocode simulations, etc.
 - Environment management: mitigation, remediation, policy, etc.
- The first conference announcement will be available later this year
 - Save the Date link: https://www.hou.usra.edu/meetings/orbitaldebris2019

All are invited to attend the 2019 IOC!
