

Members

The SETI Permanent Committee is chaired by a Member of the International Academy of Astronautics. Its membership draws from members of the Basic Sciences section of the Academy, as well as other Sections, but is not restricted solely to Academy members. Prospective members are nominated by the Chair, and confirmed by the Committee as a whole, to serve a five-year, renewable term. Prospective members are chosen on the basis of their involvement in the SETI discipline, their contributions to SETI science or social science, and their willingness to serve actively as a member of the Committee.
